Environments Through Imagery

Maxibit Network

Compact, lightweight system expands into a full visual display.

Set up is easy – frame opens up like an umbrella.

Adjustable feet for uneven surfaces and extra clearance.

Polarized magnetic strips for seamless precision.

Snap-on locking infills allow for more creative configurations.

Portability plus a podium – a seamless beauty.

Image is everything, especially when you are face-to-face with your customer. The Maxibit Network has everything you need to project a professional image for your product, promotion or service. Beautifully and seamlessly.

Muscular frame for a tough work-out.

For lightness, strength and rigidity few systems can match the Network. Its expandable tube frame is made of anodized high-grade aircraft aluminium with a unique weight-to-strength ratio. Because of its proven, built-in durability, the Network system is virtually impossible to break in normal use.

Change and grow at every show.

Add inches to your height or extra sections to your width. The Network is designed so that, without tools or tinkering, the frame can be expanded, reduced or reconfigured on the spot. Change it from a flat to a curve, to an S-curve. Or, build it into a breath-taking arch that towers above or an intriguing ceiling that hangs overhead. The opportunities are endless.

Maxibit Network.

Specification: **Maxibit Network**

Versions: Curved, Straight, S-shaped, SquareEdge, custom heights

Construction: Aluminum pop-up system. The system, graphics, lights, extension cord, and accessories are transported in the All-In-One Case.

Graphics: Laminated paper or digital transparencies, matte or glossy.

Graphic size: Front panel: 68x223,5 cm, Side panel: 66x223,5 cm, SquareEdge: 30,1x223,5 cm
Back panel: 80x223,5 cm, Straight panel: 73,3x223,5 cm,
Display counter panel: 162x82 cm.

Width: Four sections = 320 cm. The number of sections may be freely added.

Depth: Each section is about 30 cm deep.

Height: Three sections = 225 cm. The number of sections may be freely added.

Weight: 4x3 sections = 33 kg incl. graphics, lighting and display counter.

Pop up at trade fairs, conferences, seminars.

Maxibit | Network

Portable marketing in a box.

The entire Network display fits neatly into a portable, protective case. Inside, separate compartments simplify storage of metal hardware from the panels. The case then transforms into your presentation podium, adding value and impact to your display.

Ingeniously simple to set up.

The magnetic infills on the Network are designed to be universal and one frame section high. This means any infill can fit on any section of the Network frame, making set-up a whole lot faster and simpler than most other systems.

Attract customers like a magnet.

When your graphic display panel meets the magnetic infill, opposites really do attract. The Network system is "mag-to-mag", and is designed to lock together, guaranteeing a seamless, perfectly aligned graphic image.
